The indispensable synergy between the research work of the Faculty of Agricultural Sciences of the Universidad Central del Ecuador and the demand for visibility of its results has cultivated an important legacy of propagation of agricultural scientific information that was born in the middle of the last century with the pioneering and cherished Rumipamba journal, which for a long time was the organ of scientific dissemination of the first agricultural faculty in Ecuadorian academia.

This research and editorial heritage demands the continuity of the issuance of judgments on the value of the effectiveness of research processes, in addition to remaining at the forefront of the dissemination of scientific knowledge in the sector, observing high standards of editorial management for the publication of focused manuscripts, now not only in the agricultural sector, but also in the area of knowledge of tourism, which is reflected in the issuance, for the past 10 years, of the scientific journal *Siembra*.

The Faculty of Agricultural Sciences of the Universidad Central del Ecuador is pleased to celebrate the tenth anniversary of *Siembra*, its scientific journal which, thanks to the professional work of its Editorial Committee, has managed to establish itself as a benchmark among the University's scientific journals, being its best ranked and with the best affiliations in specialized indexers, and now it is projected as the scientific journal of the Life Sciences knowledge area, reaffirming the tireless pursuit of excellence under the inspiration of all-powerful wisdom.
